

WARNING

All the products manufactured by **SuperLift** are sold with the express understanding that the purchaser is thoroughly familiar with the safe and proper use and application of the product.

SuperLift products generally are intended for tension or pull, side loading must be never be applied, as it exerts additional force or loading which the product is not designed to accommodate. Responsibility for the use and application of the products rests with the user.

Ratings shown in **SuperLift** literature are applicable to new or "in as new" condition products.

In general the products displayed in **SuperLift** literature are used as part of a system being implemented to accomplish a task. Therefore, we can only recommend within the Working Load Limit, or other stated limitations, the use of products for this purpose.

Load limit ratings indicate the greatest force or load a product can carry under usual environmental conditions. Shock loading and extraordinary conditions must be taken into account when selecting products for use in a system.

The Working Load Limit may be affected by wear, misuse, abuse, overloading, corrosion, deformation, intentional alteration and other use conditions. Regular inspections must be carried out to determine whether use can be continued at the designed W.L.L. a de-rated W.L.L. or whether the product must be withdrawn from service.

Failure of the product can occur due to misapplication, abuse, or improper maintenance.

Product failure could result in property damage, personal injury or death.

Use only new genuine **SuperLift** spare parts as replacements when servicing or repairing **SuperLift** Products.
